BASE BID ITEM

\$ _____

Provide all labor, materials, expertise, equipment, transportation, and facilities required to restore a 2.5 acre site of exposed soil at Stone's Ranch Military Reservation (SRMR) to reduce erosion, enhance biodiversity, and increase usable training area lands. Most of these sites are currently un-vegetated and exposed well-drained soil is washed into adjacent wetland areas during storm events. Project site is the located on both sides of the entrance road near the fuel point and vehicle storage areas at SRMR. The proposal for the restoration of the sites includes spreading 4 inches of topsoil, blending topsoil and existing substrate, and re-vegetating exposed soil. All existing trees and shrub areas will remain untouched, and are not included in this project. The natural resources management goal is to increase and enhance upland grassland habitat in accordance with the attached scope of work.
